(54) Title: A ROUTER OR BRIDGE DEVICE COMPRISING AN INSTALLATION APPLICATION

(57) Abstract: A router or bridge device (4) for connecting for example a local area network to a wide area network is described. According to the invention, the router comprises: - means (13) for connection to a first network (6) and means for connection to a second network (12); - an application for selecting configuration parameters, wherein the application applies a template for presenting parameters to a user, said template being uploadable to said device.
